

SELLE ROYAL PRODUCT CATALOGUE AM 2019

SELLE ROYAL

PRODUCT CATALOGUE

AM 2019

To evolve you have
to innovate. To move
forward you have to
look back.

Technology powered.

Design inspired.

One thing has remained
unchanged our
Comfort experience.

This is the Selle Royal
commitment to
supporting cyclists the
world over.

SELLE ROYAL SCIENTIA FOR CYCLISTS

The scientific range of saddles, developed in collaboration with the University of Cologne.

Page 4

SELLE ROYAL COMFORT FOR CYCLISTS

A range with lines developed for every type of Riding Position from Athletic to Relaxed.

Page 14

SELLE ROYAL SCIENTIA FOR CYCLISTS

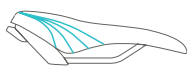

Scientifically developed in collaboration with

**Deutsche
Sporthochschule Köln**
German Sport University Cologne

FEATURES

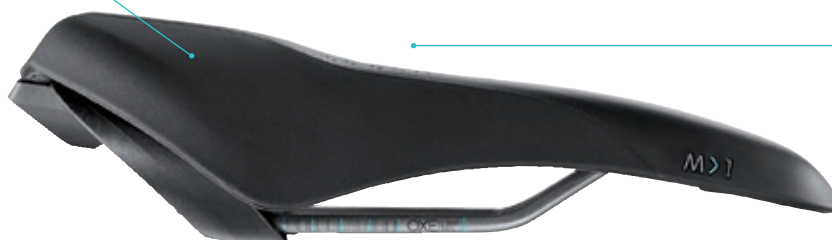

BODY CONTOUR

A radius-specific design to provide optimum comfort for differing spine angles. The more inclined the Riding Position, the smaller the edge-radius.

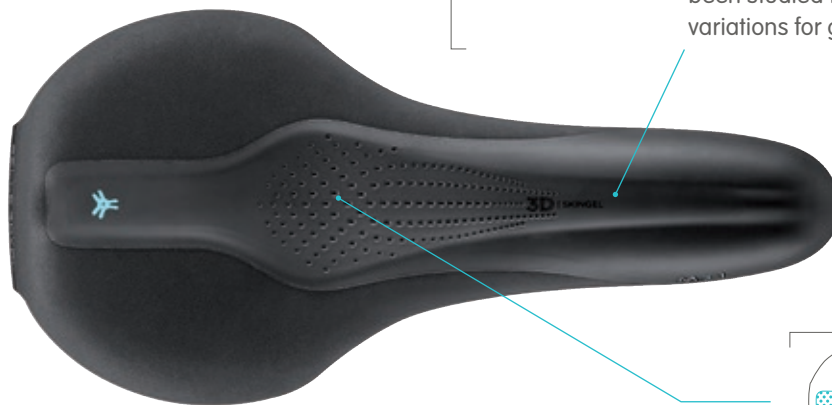

REAR PLATEAU

An elevated rear section to prevent backward sliding and decrease pressure in the saddle middle which can cause discomfort.

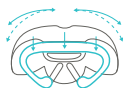

CENTRAL RESERVOIR

Indentation in the saddle middle whose shape and dimensions have been studied to correspond to ischial variations for greater comfort.

3D SKINGEL

Royalgel™ is placed intelligently at critical points of contact on the saddle surface for added shock absorption, while reducing overall saddle weight.

CURVA SUSPENSION

The unique curved suspension design is attached at the rear of the base to offer exclusive comfort by avoiding pressure on the seat bone contact points and guaranteeing additional lateral flexibility.

MEASUREMENT STEPS

1 FIND YOUR RIDING POSITION

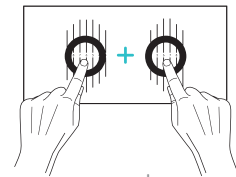

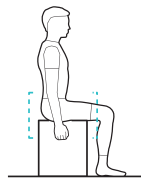

2 DETERMINE YOUR ISCHIAL VARIATION

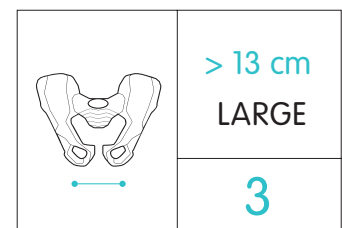

Reset the gel pad.

Sit at 90° and apply pressure.

Find the centres of the two ischial impressions and add together the two numbers. The result is your ischial distance.

example:
5cm+7cm=12cm

> Measuring Tools sold separately.

SELLE ROYAL COMFORT FOR CYCLISTS

Selle Royal has categorized 3 riding positions to address some important contact areas: Athletic, Moderate and Relaxed.

Riding position naturally has the most influence on how the sit bones and other intimate parts of the body contact the saddle. It's these contact points that must be addressed with specific saddle designs.

RIDING POSITIONS

ATHLETIC 45°

The Athletic rider typically sits on the saddle with a 45-degree spine angle. This more upright position moves the weight distribution and sit bone area farther back on a saddle.

MODERATE 60°

The Moderate rider typically sits on the saddle with a 60-degree spine angle. This position continues to move the rider's weight and sit bones farther back on a wider saddle.

RELAXED 90°

The Relaxed rider typically sits upright with a 90-degree spine angle. This position places over 60% of the riders weight directly over the rear of the saddle.

5 DIFFERENT LINES FOR DIFFERENT CYCLISTS:

ezone

eZONE combines Acceleration Control, eFit Design, and special features to offer improved comfort, safety and control to eBike users.

respiro

The top of our line. A central ventilation channel keeps you cool twice as long as ordinary saddles, while the unique ergonomic shape increases comfort by minimizing pressure.

LOOKIN

Observe the Royalgel™ experience through windows on the saddle's cover. This line, due to its lighter weight, is dedicated to trekking use.

Premium

Superior comfort for every taste. Premium saddles are made using our innovative Royal Vacuum Light technology that enables these saddles to be 100% sealed against the elements and 20% lighter. Models available for every bike and riding position.

Classic

Affordable comfort manufactured to Selle Royal quality standards guarantees a first class saddle. Models available for every bike and riding position.

COMFORT FEATURES

Selle Royal has over 50 years' experience researching and developing innovative materials, designs and advanced technology to produce the most comfortable high performance saddles on the market.

Check out on the technical table for each specific saddle to see if a particular feature is available.

3D SKINGEL

3D SKINGEL

3D Skingel is an advanced, flexible system where Royalgel™ is placed strategically according to the anatomical needs of the rider, resulting in a lighter weight saddle, while maintaining pressure reduction on the perineal and ischial areas up to 40%.

ROYALGEL™

Royalgel™ guarantees the highest level of comfort, reducing pressure peaks by up to 40% thanks to its unique tridimensional gel structure.

SLOW FIT FOAM

With its unique slow recovery property, this memory foam provides superior comfort by molding itself to fit the shape of the body's contact points, creating more uniform pressure distribution while maintaining effective support.

FOAM MATRIX

The foam matrix open cell structure confers increased elasticity and breathability to guarantee a durable and comfortable saddle.

SuperFabric®

SUPERFABRIC®

SuperFabric® is the ultimate cover material. It's made with two layers of fabric and one layer of micro-guard plates – there to protect the fabric beneath from damage. This precision-engineered combination creates a grippy external surface with guaranteed resistance to cuts, abrasions and punctures – without compromising on flexibility.

FLEXITE SYSTEM

The FLEXITE shell system was created to balance flexibility with strength – maximising performance through a unique, indented 'channel' structure on the bottom of the saddle body. This innovative construction guarantees extraordinary flexibility and shock absorption during riding.

NEW

DOUBLE-COVER SIDE PROTECTION

A double-layer material applied to the sides of the saddle to double resistance against impacts and abrasions.

WATER RESISTANT

Royal Vacuum Light is a Selle Royal Technology that allows the saddle to be 100% sealed and 20% lighter than ordinary saddles of the same category.

STRENGTEX COVER

The cover is made from a unique layer of elastic material to guarantee a saddle of great durability.

COOL COVER

Our extraordinary cover is up to 25°C cooler than normal black saddles due to our special material which reflects sunlight.

VENTILATION CHANNEL

Relieves pressure on the perineal area, while reducing uncomfortable perspiration.

ELASTOMERS

Safe, silent and permanently non-deformable, an elastomer can absorb even the severest and most unexpected shocks, because it works vertically and horizontally.

DOUBLE SPRINGS

Some Premium and Classic saddles are equipped with double springs to guarantee a great suspension with their two complementary movements.

INTEGRATED CLIP SYSTEM

A patented clip system positioned at the rear of the saddle for easy attachment of a light or saddle bag.

ezone

Together with Designworks, a BMW Group subsidiary, Selle Royal undertook the first-ever, comprehensive study of eBike users to determine performance characteristics that could benefit from an eBike-specific saddle design. The result is eZONE: the first saddle specifically developed to improve eBike safety, comfort and riding performance.

3D | SKINGEL

SELLE ROYAL

Designed by

Designworks
A BMW Group Company

FEATURES

3D Skingel

A tridimensional gel structure that reduces pressure peaks by up to 40%, placed intelligently to reduce overall saddle weight.

eFit Design

An elevated rear section to prevent backward sliding and shorter nose to aid in mounting.

Acceleration Control

Three zones with specific shapes and dimensions, featuring flexible wings for enhanced control and balance, for added safety during acceleration.

eGrip

A fibreglass handle integrated into the saddle rail, for easy manoeuvring while maintaining increased battery and accessories access.

POP MATERIALS

RETAIL STATION

Studied, minimal design and colours to complement any eBike retail sales environment.

- Pre-filled with 9 products, ready to sell.
- Free consumer test saddle displayed overhead in dedicated glorifier.
- Brochure holder with 10 detailed product brochures.

CODE: SREZONEA00000

eZONE WALL DISPLAY

NEW

Informative wall display in 2 languages (English + German) with metalhooks slatwall/ tegometall compatible.

- Free consumer test saddle already pre-charged.
- 4 eZone saddles for sale.
- eZone showcard in cardboard.

CODE: SREZONEA10000

respiro

Leaving a bike in the sun or riding in hot weather can raise your saddle temperature to an uncomfortable level. To avoid unpleasant perspiration and discomfort, the Respiro line is designed with a ventilation channel and special materials to minimize saddle heat.

Classic

Affordable comfort is found in our Classic line, manufactured to Selle Royal standards to guarantee a first-class saddle. This line utilizes

Royalgel™ in most models, an exclusive polyurethane gel that delivers superior comfort by reducing peak pressures in the sensitive areas by up to 40%, some models are padded with Slow Fit Foam, a memory foam that molds to rider's body.
